 comprehensive creativity
 accessible solutions
 fairness
 climate justice
 community-led approaches
 interdisciplinarity

What could fair access to resources look like in your context?

Support for the global south

Ensuring VC funding goes to under represented groups

inclusive educational resources

Inclusion of the marginalized groups

Support Marketing to correct customer

inclusive design for resource allocation

Bring finance

Purpose with passion

What could fair access to resources look like in your context?

Required good team

shared ownership &
decision-making

Intentional financing -
taking into account local
contexts

Inclusive cities

Increase awareness

Affordable green
technology for all

Understand the correct
vision

Social entrepreneurs
have the opportunity to
scale their vision.

What could fair access to resources look like in your context?

Fintech

equitable funding
distribution

Affordability is a
question in minds of
customer

Scaling the new
technology

What would make a space feel safer or more welcoming for everyone?

colors

The policy thinks about everyone before implementation

well-lit streets

effective legal infrastructure

It teaches us that climate-friendly spaces must also be safe, accessible, and inclusive for all, especially women and vulnerable groups

security actors

More open spaces and more open activities

Bike friendly streets so you can bike at anytime (coming from an Amsterdammer!)

What would make a space feel safer or more welcoming for everyone?

Representing every voice

A space that evokes ownership

The best model of women representation

One where bicyclists and pedestrians are prioritised.

female officers and community network for safety provision

Accessibility for people with disabilities

accessibility

Shared public spaces that are green

What would make a space feel safer or more welcoming for everyone?

Reduce dependence on fossil fuels and move to the alternative energy sources

consultations directly with communities on the needs

What could help make sustainability more accessible in your own city or community?

It teaches us that climate-friendly spaces must also be safe, accessible, and inclusive for all, especially women and vulnerable groups

Accessible exits
(transportation available)

Affordable price points

Living libraries of household tools and applications being funded by the local governments

Affordable green options, rewards for eco-friendly habits, and social media campaigns to motivate young people.

Public funds

local consultations on needs directly in the community

Incentives for green and circular habits

What could help make sustainability more accessible in your own city or community?

bike lanes, greenways,
and safe pedestrian
routes

Love this circular idea
for social housing from
REDO!

reduce dependence on
fossil fuels and encourage
alternative energy sources

citizens led initiatives

more smart houses

reuse centres, repair
cafes, zero-waste
markets

participant budgeting

stories about a good life in a
climate neutral city to
inspire new ways of living

What could help make sustainability more accessible in your own city or community?

community gardens

guides for access (e.g.
where to find what)

trustable certification
system

energy efficiency
technology at home

Not making sustainability a
consumer choice that is
exclusive to those who have
the money to afford it. Making it
affordable for lower
socioeconomic groups.

Platform to connect and
support folks with shared
commitments and
resources.

What practices could deepen ecological belonging in your work or community?

connecting with nature

Respecting all living creatures on the land beyond the human beings

listening local communities

Understanding it deeply from a systems thinking POV

Creating shared stories and narratives

Games that can show our connection in a playful way

Spending time in nature to understand what we are trying to protect

intergenerational & intercultural learning

What practices could deepen ecological belonging in your work or community?

Creating games that link work and community to incremental change in reducing environmental impact.

climate-justice centered environmental work

Communtiy gardens in big cities

art-based practices as ecological dialogue

Whose voice or culture would you love to see more included in your workplace or projects?

Indigenous communities

Young people! We have
such a gap in
representation of people
under 25

Young voices

global south

more ladies

Those from lower
socioeconomic
backgrounds

Migrant/refugee
communities

non-english speakers

Whose voice or culture would you love to see more included in your workplace or projects?

Elderly people

refuges and displaced
people

mothers

people from
marginalized
backgrounds

people from the global
south

What's one practice you commit to explore further after this session?

be more conscious
about my biases

How we can engage more
effectively with our
communities at the start of
projects to understand their
needs with less assumptions

To strive more to spread
climate awareness

deep co-creation with
marginalized voices

Committing to better
storytelling on this

Engage in more
collaboration

Climate resilience viz-a-
